

NexTeams365

Why

NexTeams365?

Microsoft Teams is today a central pillar of unified communications. But as soon as voice comes into play — multi-sites, multi-operators, Direct Routing, or Operator Connect — the complexity explodes.

NexTeams365 is the platform designed for large enterprises that want to take back control of their Teams telephony while automating critical tasks.

NexTeams365

The voice management console for **Microsoft Teams** in complex operator environments.

Principales fonctionnalités

Provisioning & automation

- Role management: global or local admin by site
- Smart assignment from configured number ranges
- IAM integration (FIM/MIM, AAD)
- Role management: global or local admin per site

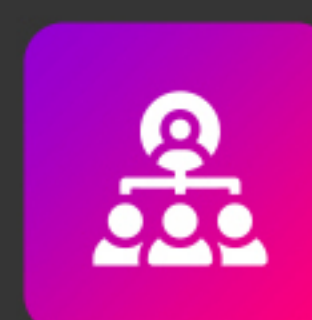

Multi-site & multi-operator management

- Native support for Direct Routing and Operator Connect
- Mapping of sites, gateways and numbering ranges
- Multi-tenant compatibility
- Direct link with SBCs or operator partners

Call handling

- Custom routing by site, service or extension
- Number transformation rules (incoming / outgoing)
- Conditional call blocking (by pattern, range, category)

Supervision & reporting

- Native integration with SCOM
- SSRS (Reporting Services) Dashboards
- Monitoring provisioning errors, blocked calls, anomalies

Billing and cost tracking

- Assignment of calls to cost centers (user, site, gateway)
- Automatic sending to accounting systems (ERP, analytical)
- Cost calculation via personalized price list
- CDR Teams Integration
